PROFESSIONAL SUMMARY

Aspiring Full Stack AI Engineer with a strong foundation in Python, React, and Flask and hands-on experience building Generative AI applications using LangChain and Retrieval-Augmented Generation (RAG). Skilled in developing REST APIs, integrating LLMs into practical workflows, and building responsive web applications end-to-end. Strong problem-solving ability with a growing portfolio of deployed, real-world projects.

TECHNICAL SKILLS

Python

- Strong understanding of Object-Oriented Programming (Classes, Objects, Inheritance, Polymorphism, Encapsulation)
- Good knowledge of Exception Handling
- Familiar with Functions, Modules, File Handling, and List Comprehensions
- Experience working with virtual environments and pip

SQL

- Understanding of RDBMS concepts (tables, constraints, keys)
- Knowledge of SQL queries (DDL, DML, TCL, Joins, Grouping, Subqueries)

Web Technologies (HTML, CSS, JavaScript)

- Strong understanding of semantic HTML (<header>, <section>, <article>, tables, multimedia tags) Good knowledge of CSS (Selectors, Box Model, Flexbox, Positioning)
- Familiar with JavaScript basics (variables, loops, functions, DOM manipulation, event handling, async/await)

AI & LLM

- Retrieval-Augmented Generation (RAG), LangChain, FAISS, Hugging Face Embeddings, Groq API Vector Databases.

React.js

- Strong understanding of **JSX, Functional Components, Props, and State**.
- Familiar with **React Hooks (useState, useEffect)**.
- Experience building **responsive and reusable user interface components**.
- Good knowledge of **React Router, API integration, and event handling**.

Flask & REST API

- Strong understanding of **REST API concepts and HTTP methods (GET, POST, PUT, DELETE)**.
- Experience building **RESTful APIs using Flask**.
- Familiar with **CRUD operations, routing, and request/response handling**.
- Good knowledge of **JWT Authentication and API testing using Postman**.

Tools

- Git, GitHub, VS Code, Postman, Vercel.

PROJECTS

1. AI Project Manager

Technologies: React.js, JavaScript, HTML5, CSS3, AI/LLM, Vercel

GitHub: github.com/Rashvanth-P/ai-project-manager

Live Demo: ai-project-manager-nu.vercel.app

- Developed an AI-powered web application that generates software project plans from user requirements.
- Integrated a Large Language Model to generate project scope, milestones, task breakdown, and development timeline.
- Built a responsive React.js frontend with a clean, intuitive user interface.
- Implemented AI-assisted project planning to help users quickly organize software projects.
- Deployed the application using Vercel.

2. AI Resume Analyzer (RAG-Based System)

Technologies: Python, Streamlit, LangChain, FAISS, Hugging Face Embeddings, Groq API

GitHub: github.com/Rashvanth-P/ai-resume-analyzer

Live Demo: <https://rashvanth-ai-rag-project.hf.space>

- Built an AI-powered resume analyzer using Retrieval-Augmented Generation (RAG).

- Processed PDF resumes and generated semantic embeddings stored in a FAISS vector database.
- Implemented resume-to-job-description matching using vector similarity and LLM analysis.
- Developed a Streamlit interface for uploading resumes and viewing AI-generated insights.
- Tested endpoints using Postman, following REST principles with proper HTTP methods and endpoint design.

3. Golden Plate Restaurant Website

Technologies: React.js, HTML5, CSS3, JavaScript, Vercel

GitHub: github.com/Rashvanth-P/goldenplate.react

Live Demo: goldenplate-react.vercel.app

- Developed a responsive restaurant website using React.js.
- Built reusable components for menu, gallery, services, and contact sections.
- Designed a modern, responsive interface using CSS Flexbox.
- Improved user experience through component-based architecture.
- Deployed the application using Vercel.

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern — Rinex

Jan 2024 – Mar 2024

- Worked on core Artificial Intelligence and Machine Learning concepts.
- Implemented Python programs related to AI use cases.
- Learned and applied data preprocessing and model evaluation techniques.
- Participated in AI project development and hands-on practical assignments.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering

Sri Ramakrishna Institute of Technology, Coimbatore, Tamil Nadu, India | 2022 – 2026 | CGPA: 7.1

Higher Secondary

Amala Matric Higher Secondary School, Musiri, Tamil Nadu, India | 2020 – 2022 | 65.8%

Secondary School

Amala Matric Higher Secondary School, Musiri, Tamil Nadu, India | 2019 – 2020 | 67.8%

CERTIFICATIONS

- IBM — Use of Generative AI for Software Development Skills
- NPTEL — Internet of Things (Elite + Silver)
- Kaggle — Introduction to Machine Learning
- Python — CareerLadder, Coimbatore (Dec 2025 – Feb 2026)
